

FileMaker Development Solutions

Indium and Claris have partnered to increase the reach of low-code offerings for custom app development, to organizations. Working together, the two companies enable organizations to develop robust & interactive web and mobile applications towards building a more optimized digital ecosystem. With **Claris FileMaker's low-code platform and Indium's strong expertise in low-code development**, the two companies can accelerate the adoption of scalable and responsive app development solutions that deliver business value.

Low Code and beyond!

Indium Software is a technology solutions company with over 20 years' experience providing bespoke solutions that focus on low-code development, hybrid app development, data management and data analytics. Indium has a global presence, serving innovative product start-ups, Fortune 500 companies, and global enterprises. Indium specializes in:

1. Low-code custom development across platforms and devices
2. End-to-end cross-functional application testing for performance, security, and other areas
3. Data warehousing, business intelligence (BI), and data analytics
4. Establishing high-performing centers of excellence dedicated to all areas of expertise

Indium's **certified FileMaker team of experts** can help architect and implement custom applications to match the specific requirement and objectives of an organization. Indium's Development Center of Excellence established with years of experience in the field can provide an additional boost for organizations to leverage in their endeavor.

Some of the aspects that sets Indium apart:

- Extensive Low code development expertise
- Dedicated R&D team to drive innovation
- 100+ certified low code developers
- Industry agnostic coverage and cross-industry knowledge sharing
- Capability across various platforms, devices, formats etc.,
- Development expertise on version FileMaker 9+

As a solution provider with nearly a decade of low-code development expertise, Indium is in the ideal position to assist in implementing and expanding the Claris FileMaker Platform at any level required. Additionally, with a wide breadth of technology expertise, Indium can lead companies into other areas beyond the scope of application development.

Indium on FileMaker

Indium specializes in the design, development, implementation, and support of customized FileMaker solutions. They include:

- FileMaker Pro Custom Development (Windows and Mac)
- FM Go Development (iOS - iPhone, iPad)
