Digital
Accelerators .

teX.ai™

Indium's **AI powered Accelerator,** which automates the text analytics lifecycle by leveraging ML, NLP, and Gen AI, from any data source without manual intervention. Available as an On-Prem, Cloud or Hybrid deployment model.

uphoriX
A SMART TEST PLATFORM

uphoriX is Indium's **all-in-one smart test automation** platform for your functional, regression, performance, security and compatibility testing needs.
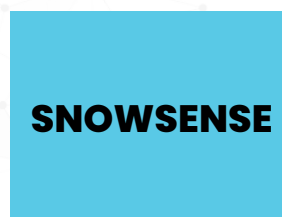

ibriX

Indium's **Prebuilt Accelerator** for Databricks implementation lifecycle, including Analytics, Cloud Automation & Optimization, Data Assurance, DataOps, MLOps and Data Governance.

iDAF

Indium's **Data Assurance Framework**, is an all-inclusive solution that accelerates validation of heterogeneous target and source datasets for Data Quality, Completeness, Integrity and Consistency.

INTACT

Indium's INTACT provides accelerators around Striim version upgrades, automated deployments and quality assurance framework for various phases of the Striim implementation journey.

SNOWSENSE

Indiums comprehensive set of migration accelerators to enable 3x faster migration and deployment to Snowflake.

BPM-Nitro

Indium's BPM Nitro comes with 400+ pre-built functional integrations with Camunda, eliminating manual coding and errors.
