

LOW CODE **APP DEVELOPMENT**

Because Low-Code is the new normal!

In 2020, low-code development went mainstream. Organizations everywhere prioritized the ability to adapt to rapid change, making the low-code application platform (LCAP) an essential part of the enterprise technology stack. LCAPs allow businesses to deploy applications faster than ever before, often in a matter of one to three months. In contrast, third-party applications can burn through way more time and money depending on the size of the organization and the complexity of the system involved.

INDIUM'S JOURNEY WITH LOW-CODE

Indium boasts a 100+ member team of certified, rapid and advanced developers specializing in Mendix and FileMaker Development. We identified the need for enterprises wanting to adopt LCAPs to improve organizational agility, flexibility, and realize cost efficiency.

We combined our expertise in data engineering, advanced analytics and QA with our low-code development solutions. This amalgamated into Indium offering bespoke solutions around low code development:

Secure Applications

Low-code platforms come with Enterprise-grade security (ISO / IEC 27001) and AQM add-ons. As an additional security measure, Indium's security framework which is OWASP Top 10 and SANS Top 25 compliant, renders a thoroughly secure application.

AI based development Approach

Indium's expertise in Python, Tensorflow, Keras and more creates the most intuitive app by building AI models and chatbots as per your requirement.

Enterprise Integration

We integrate Mendix seamlessly with your existing enterprise application such as Salesforce, SAP, Oracle, FICO etc, and significantly increase the adaptability of your IT landscape.

Web & Mobile applications at Speed

Your applications are automatically available as native mobile apps on various operating systems, like iOS, windows, and android.

Dashboards and Reports

Generate simple and easy dashboards in real-time from data lakes to understand the status quo and gauge efficiency spurts. Generate reports directly from data lakes. We can integrate visualization tools such as Domo, Power BI, Tableau and more for effective data consumption.

Analytics and Processing

Indium can build analytical models on development for downstream analytics depending on the requirement. Kafka integration can be done for real-time processing.

ENABLING ORGANIZATIONS TO LEVEL UP BY

LOW-CODE SUCCESS STORIES

- Faster processing of claims elevated customer satisfaction by up to 20% for the leader in MRI diagnosis located in the US - [Read More](#)
- Reduced response time of the support team for the triggered issues by 80% for a manufacturing firm in Switzerland - [Read More](#)
- Reduced the application maintenance and enhancement costs and effort by nearly 50% for a middle eastern government organization - [Read More](#)
