- Featured in Gartner’s Testing Vendor Guide – 2013

Key Highlights

- 19+ years of end to end solutions
- 650+ member team
- 4 IP solutions for enabling accelerated testing
- Presence across 6 countries
- Partner Solutions from Leading Technology Vendors
- Global Delivery Model

350+ Customers across Digital, QA and Gaming

© Indium Software
Digital

Big Data Engineering
Architect | Implement | Optimize | Maintain
Technologies: Hadoop, Spark, MongoDB, Elastic Search, Redshift, Kafka, Snowflake, Cassandra

Advanced Analytics
Descriptive Analytics & Dashboards using R Shiny, Tableau, Qlikview
Algorithms Expertise: Naive Bayes, Random Forests, Neural Networks, SVM, NLP and Apriori

Blockchain Solutions
Blockchain Development | Protocol Research | Market Assessment | Use-Case Analysis using Hyper Ledger, Bitcoin Core, Ethereum and R3 Corda

Product Development
Full Stack Development using Java, AngularJS, ReactJS, NodeJS, MEAN stack, Web Services, Mendix on cloud platforms such as AWS, Azure and Google Cloud

Domains:
- FinTech
- IoT
- CPG
- Retail
- Startups
- Healthcare
- Supply Chain Management
- Utilities
Independent QA

Core QA
- Functional Testing
- Compatibility Testing
- Regression Testing
- User Acceptance Testing

Specialized QA
- DevOps Testing
- Cloud Testing
- API Testing
- Data Quality Validation
- Compliance Testing – PCI DSS, FDA, 21 CFR Part 11, HIPAA, ADA

Technology Transformation Solutions
- Test Automation
- Performance Testing
- Security Testing
- Mobile Test Automation

Domains: Banking, Retail, Education, Logistics, Technology, Healthcare & Life Sciences

KEY Differentiators

- Key focus on niche services
- Solution Accelerators
- IPs in Automation at no cost
- Customer-Centric Systems & Processes
- On demand ramp up and down of resources
- Global Engagement Models
Levers for Success

- Competency
- Technology Expertise
- Domain Expertise
- Tools & Reusability
- Process Maturity
- Cost
Test Execution Models

RESOURCES AUGMENTATION
- Resource allocation
- Engage Domain and Technical Expertise
- Project Management by the customer

ON-SITE : NEARSHORE: OFFSHORE TESTING
- Designed for deployment of major proportion of the team at offshore / nearshore
- Small team of engineers at onsite for knowledge transfer and coordination
- Project managed by Indium or by the customer

ON-SITE <-> NEAR SHORE <-> OFFSHORE (Follow The Sun Model)
- Designed for round the clock support through the Onsite – Near shore – Offshore model
- The geographical proximity & spread provides several benefits in terms of effective communication, quicker turnaround times
- Project managed by Indium or the customer

ON-SITE MANAGED TESTING
- Designed for projects which require the presence of the team in close proximity to the development / business
- Project managed by the Client /Indium

Accolades

"These are great again, we are really trying harder and harder to find something we disagree with but they look perfect..." (About Indium’s Test Case Documentation)

- VP Product Development of a leading event planning SaaS provider

“We would like to appreciate all the efforts and dedication put in by you and your team during the Product performance benchmarking period. I would also like to confirm that we have received all documents regarding the performance benchmarking results as per our expectations.”

- Head of Engineering of a leading business intelligence (BI), analytics and optimization solutions provider

“I can’t say enough about how great this team has been. We have had a launch on 4 platforms – first geo-locked, and then world-wide. The team has been very adaptive to last minute overtime requests, and have done so cheerfully. They have been integral to a very successful launch (we were number #3 in casino worldwide in Apple store). We also have a 5 star rating in the Apple store.”

- QA Lead of a Billion Dollar Online Gaming Studio

“Your framework is definitely the best, robust and highly maintainable in comparison to other frameworks that I have seen. The other vendors were not able to answer our questions and you guys certainly know what you do. This is the exact framework that I am looking to implement”

- QA Manager of a leading provider of innovative access solutions
